

# NOTICE OF REVIEW

## APDES Preliminary Draft General Permit

Alaska Department of Environmental Conservation (ADEC)  
Wastewater Discharge Authorization Program  
555 Cordova Street  
Anchorage, Alaska 99501

### NOTICE OF REVIEW OF AN ALASKA POLLUTANT DISCHARGE ELIMINATION SYSTEM (APDES) PRELIMINARY DRAFT GENERAL PERMIT TO DISCHARGE TO WATERS OF THE UNITED STATES

ADEC has prepared an APDES preliminary draft Multi-Sector General Permit for permit reissuance. This permit would regulate the discharge of storm water from industrial facilities into waters of the United States. Prior to the formal 30-day public notice period, ADEC invites you to review the preliminary draft general permit, fact sheet, and associated documents. You can access the documents from ADEC's Wastewater Discharge Authorization Program web page at:

<http://dec.alaska.gov/water/wastewater/>.

#### **Preliminary Draft General Permit Review:**

**Start Date:** October 4, 2019

**End Date:** October 17, 2019

**Permit No.:** AKR060000

#### **Proposed Permit Coverage:**

The Multi-Sector General Permit (MSGP) requires industrial facilities to implement and maintain site-specific storm water control measures and to develop a site-specific storm water pollution prevention plan (SWPPP). The current MSGP regulates the discharge of storm water from an estimated 375 industrial facilities in 29 industrial sectors. These sectors include mineral mining, coal mining, sand and gravel mining, boat harbors, and larger airports.

The MSGP includes direction on the types of storm water control measures to install to limit the extent of storm water runoff. The permit includes inspection requirements during construction and active mining from mineral, coal or sand and gravel mines. For all sectors, there are monitoring and reporting requirements.
